DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-3 are rejected under 35 U.S.C. 102(e) as being anticipated by Aslam et al.

Aslam et al. shows an air knife having a fuser roller 12, pressure roller 14, manifold 40, air outlet 48 and a plurality of secondary outlets 50.

As to claim 3 and the limitation of a print engine, it is noted the invention is directed to the air manifold used in the environment of electrostatographic copiers which will inherently have at a print engine although not shown, see column 1, lines 21+.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Moore et al., Ciaschi et al., and Bogoshian all show devices in the general state of the art of the invention.
